## **DETAILED ACTION**

## Allowable Subject Matter

Claims 1 – 20 are allowed.

The following is an examiner's statement of reasons for allowance: Claim 1, recites a method for utilizing a continuous mode laser driver circuit for a burst mode application structure including the specific structure limitation of converting the temperature compensation signal from the temperature compensation signal output of the chip into a pulse width adjustment signal by a pulse width adjustment circuit, wherein the pulse width adjustment signal is inputted into the pulse width adjustment input, and the pulse width adjustment signal automatically adjusts cross points of the optical eye diagram of the laser output according to environmental temperature, the cross points being maintained at a predetermined level and the bit error rate of system being reduced, which is neither anticipated or disclosed nor suggested in any piece of available prior art, which is neither anticipated nor obvious over the prior art of record.

Claim 9 recites a laser emitting apparatus for a burst mode application structure including the specific structure limitation of a *pulse width adjustment* circuit connected to the laser driver circuit, the pulse width adjustment circuit

Application/Control Number: 10/802,325

Art Unit: 2828

receiving the temperature compensation signal to generate the pulse width adjustment signal; wherein the pulse width is the pulse width of the optical eye diagram of the laser output, the laser driver circuit adjusts cross points of the optical eye diagram by adjusting the pulse width, so that the cross points are maintained at a predetermined level, which is neither anticipated or disclosed nor suggested in any piece of available prior art, which is neither anticipated nor obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Delma R. Flores Ruiz whose telephone number is (571) 272-1940. The examiner can normally be reached on M - F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Min Sun Harvey can be reached on (571) -272-1835. The
